THE ALL NEW, PEEP ALIGNER...
FINALLY, NO MORE TUBES,
NO MORE PEEP ROTATION!

PEEP ALIGNER - PATENT PENDING

Sterner Duttera teamed up with George Wonder of Cedar Hill Archery to produce the Peep Aligner. Over a year of research and development, we have finally solved the issue of string, or as some call it, peep rotation. Actually, peep rotation is caused by string rotation. The string is essentially fighting to "untwist" itself. This causes the string to actually be unbalanced, thus the peep rotates when the bow is drawn. Some of the pressure is taken off of the string around the served area and the string tries to relieve itself.

WORKS WITH ANY PEEP SIGHT! Simply press your bow to relax your string, install the Peep Aligner between the bottom serving and the center serving, and watch over 99% of your "peep rotation" disappear! Once installed, simply tie in place, using an "over, under knot," and you're done! No more peep rotation. No more speed robbing rubber tubes that snap every other year! We feel this is one of the biggest discoveries in the archery industry in YEARS! Machined out of 6061-T6 aluminum, the peep aligner weighs only 8 grains. Available in purple, red, blue and black.

IN 2008, STERNER DUTTERA INTRODUCED THE STRING SPLITTER, THE BIGGEST BREAKTHROUGH IN PEEP SIGHT TECHNOLOGY IN YEARS. FOR 2009, WE'VE EXPANDED OUR LEAD IN THE ARCHERY INDUSTRY WITH 3 NEW STRING SPLITTERS; THE "MICRO," THE "FLY" AND THE "CLAW". THESE NEW ADDITIONS ARE GUARANTEED TO AID HUNTERS IN LOW LIGHT HUNTING SITUATIONS, NO MATTER WHAT THEIR SHOOTING STYLE. SHOOT A STRING SPLITTER, NO MATTER WHAT THE MODEL, AND

"SEE WHAT YOU'VE BEEN MISSING!"

SS

SS

The night hunters dream. Because of the huge 11/16" opening the SS is widely used by alligator and coyote hunters, who hunt primarily in the dark. The SS is the only choice to get the string out of your line of sight, and your sight on the target - fast. Weight is 60 grains. You can choose from any color you want, as long as it's black! CNC machined from 6061-T6.

JR.

JR.

The Jr. is an excellent choice for someone who hunts from a blind, or has eye problems and can't get comfortable with smaller peep sights, but still wants the accuracy advantages they offer. Many pro shooters agree, the Jr. is all they need and more, and they love the 7/16" opening! Weight is 40 grains, and is available in purple, red, blue and black. CNC machined from 6061-T6.

MINI

MINI

The Mini is our #1 selling String Splitter! Thousands of hunters have seen the difference in low light shooting capabilities and increased field of view. The Mini is ideal for all hunting situations with its 1/4" opening. That's why it's the peep of choice by most professional hunters. Weight is approximately 20 grains. Get your Mini in purple, red, blue or black. CNC machined from 6061-T6.

Tammi Gregory

MICRO

MICRO

You spoke and we listened. Hunters wanting a 3/16" opening, here's your Splitter. The Micro gives you over 3.5 X's the light to your eye over a conventional 3/16" diameter peep, and over 500% field of view. Weighing in at only 9 grains, the Micro is a must for any hunter wanting the best in peep sight technology. Choose from purple, red, blue or black. CNC machined from 6061-T6.

FLY

FLY

We took the Micro, and made it even smaller! The all New Fly, is our smallest String Splitter. Weighing in at only 7.5 grains and with a 1/8" opening, the Fly will speak for itself for all out, super long range accuracy. All of the accuracy of an 1/8" peep, with no low light disadvantages. Pick from purple, red, blue or black. CNC machined from 6061-T6.

CLAW

CLAW

Inspired by a professional hunter, this String Splitter was designed to encompass the sight aperture even more, while still allowing the most available light possible to the eye. With a 3/16" inside opening, this key-hole design will help those who need additional alignment with their sight. And weighing in at only 10 grains, it's extremely light. Available in purple, red, blue and black. CNC machined from 6061-T6.
